PEDRO GONZÁLEZ-ANTA TORRENTS-FAURA

I hold a Master's Degree in Advanced Programming for AAA Video Games, have developped using mainly **C++** and **C#**, and have actively contributed to various projects on **Unity engine** or **in-house engines**, including the successful release of a **game**.

I thrive in **collaborative** team environments and am deeply **passionate** about programming and video games. My strong **commitment** and my drive to constantly **improve**, contributes to my value as a team member. Curious about my work? Take a look at my **portfolio**.

PROJECTS

Starfall Rebellion

Project developed with an **in-house engine** on **C++**, during the Master's degree. I worked on the **engine programming**, UI/Level programming, but mostly on **gameplay programming**.

Play With Me

Indie project developed with **Unity** on **C#**, on three months and later on released on **Steam**. I worked on game design, level programming, art, but mostly on **gameplay programming**.

EXPERIENCE

Produktia TV (Feb. 2022- May 2022)

Internship where I worked as a developer within a small team of developers and artists, contributing on the creation of virtual reality projects for other companies, using Unity and C#.

Mon Petit Nicolás (Sept. 2019- March 2020)

Developed an e-commerce with javascript for the company, and worked there until the web was completely finished and they could maintain it without my services.
